

Can you defeat them all?

"This is it, kids. This is your final challenge in the Drug Buster Buddies Camp," the instructor tells Kevin and Emmy.

The young trainees look up and see the entrance to an enchanting hedge maze.

"At the other end of this labyrinth is Captain Drug Buster himself. He's eagerly waiting for the new batch of Drug Buster Buddies to help him maintain a #DrugFreeSG.

"Your task is to make it through this maze. However, danger lies ahead. Along the way, you will encounter harmful and illegal drugs that are up to their old tricks. It's up to you to make the right choices to move ahead and reach the finish line."

Help Kevin and Emmy make the right decisions to get to the other end of the maze!

CANNABIS
 "This weed can make you scream, 'Wee!'"
ABILITY:
 Can make you feel 'high'.
ATTACK:
 Uses tetrahydrocannabinol or THC, the psychoactive chemical that messes with the brain.

What should Kevin and Emmy tell Cannabis?
 "I want to keep a clear head."
 "There's no harm in smoking a little."

You'll be fine. Just say no to drugs!

Sustained attack:
 Poor memory, brain development impairment, depression, anxiety

METHAMPHETAMINE
 "I'm the life of the party!"
ABILITY:
 Will make you want more of it.
ATTACK:
 Triggers hallucinations and drug addiction. Could lead to death due to overdose.

What should Kevin and Emmy say to Meth?
 "We don't need this ice breaker."
 "It's just a chill pill, right?"

You're almost there!

Sustained attack: Severe tooth decay, sores from scratching

NEW PSYCHOACTIVE SUBSTANCES aka NPS
 "Jump on the bandwagon!"
ABILITY:
 Can mimic the same effects of other drugs such as cannabis and meth.
ATTACK:
 Contains unknown toxicity levels. You don't know what you'll get!

What should Kevin and Emmy say to NPS?
 "Let's find out what's in NPS then!"
 "You're nothing but a wannabe drug."

Sustained attack: Severe toxic reactions, overdosing

"Congratulations! You've successfully completed the Drug Buster Buddies Camp!"
